Donald Walsh – Reeve

Lynn Kauppila, CMMA
Chief Administrative Officer

August 8, 2013

Recently the RM of Woodlands has been receiving news from concerned property owners about many individuals walking along the top of the Geo Tubes at the Twin Beach area of Woodlands. People should be aware that these tubes were not designed for this purpose and accidents could occur from falling off the tubes and onto debris that is piled up in many areas near the tubes. People should also consider the privacy issues that arise when walking along these tubes, as there are many locations where they can look into people's windows due to the height advantage. Your anticipated cooperation and consideration to your neighbours would be greatly appreciated.
