Trevor King – Reeve

Adam Turner, CMMA
Chief Administrative Officer

Attention Twin Lakes Beach Property Owners:

The RM of Woodlands would like to advise property owners that the Super Sand Bag structures installed in 2014 along the Twin Beaches will be removed between September 26th and October 7th, 2016.

At this time the channel that has been obsolete since 2010 and is located just north of the Long Beach development on the lakeside; will be filled in to provide the RM with access to the lakefront area for any possible future operations.

Property owners should also be aware that Council has attempted to reallocate funding to modify and lower the remaining Geo Tube structures, however, up to this point have been unsuccessful. Council has not given up and will be meeting with the Minister responsible at some point in the future to discuss possible plans to modify the remaining Geo Tube structures in order to continue providing protection while at the same time minimizing their aesthetic impact. Therefore, for the meantime Council has decided to keep the remaining Geo Tubes in place in their present form and once progress is made on any new plans concerning the Geo Tubes, property owners will be advised accordingly.
