Donald Walsh – Reeve

Lynn Kauppila, CMMA  
Chief Administrative Officer

September 8, 2014

As of September 8, 2014, flood protection efforts undertaken by the RM of Woodlands were completed. A total of 1605 feet of Geo Tubes were installed and approx. 3315 feet of a new system of double Super Sand Bags wrapped by a tube anchored Scour Apron.

In addition, we were able to have the contractor clean up and haul away a significant amount of debris deposited along the shoreline from the 2011 Flood event.

As of today Lake Manitoba still remains at approx. 814.48 ft. which is above the flood stage. Therefore, the State of Local Emergency remains in effect for the Twin Lakes Beach area and all property owners should pay attention to any wind/storm events predicted by Environment Canada. The RM feels that the flood protection measures installed will significantly minimize structural damages during such a wind/wave event, however, caution should always be exercised.
