Twin Lakes Beach Update

December 21, 2015

The RM would like to advise you that the current system of Geo Tubes and Super Sand Bags continues to provide a level of protection from storms along Twin Beaches and accordingly we have asked the Province to extend the DFA funding required for removal costs until October 2016. The Province is now considering our request and we will update you via this website once we have an exact date for their removal.

Your continued patience and understanding is greatly appreciated by members of Council.
