

**Twin Lakes Beach Update      September 24, 2013**

**Please be advised that the RM of Woodlands will begin removing Geo Tubes from the beach area starting on September 30, 2013.**

**Removal of Geo Tubes will begin at the south end of Long Beach and will continue north from that location, stopping at Lot #350.**

**All Geo Tubes north of Lot #350 will remain in place, as the RM has obtained an extension from the Province until June 30, 2014 to have those Geo Tubes remain.**

**We are requesting that all property owners remove any personal belongings that are either on the tubes or in the immediate vicinity, as heavy equipment will be used to remove the Geo tubes and these personal items would no doubt become damaged.**
